

What Matters to Me

A Workbook for People with Serious Illness

NAME	
DATE	

the conversation project

This document does not seek to provide legal advice.

This Workbook is designed to help people with a serious illness get ready to talk to their health care team (doctor, nurse, social worker, etc.) about what is most important to them.

This Workbook is NOT about making specific medical decisions. It's about thinking about what matters most to you — and sharing your goals and preferences with your health care team. Then together you can choose the kind of care that is right for you.

DO THIS

- Do the Workbook by yourself or with someone else. Choose the way that works best for you.
- Take your time. You don't need to complete the Workbook all in one sitting. It's okay to skip questions — or come back to them later.
- Share it with your health care team. Bring the filled-in Workbook to your next appointment so you can talk over your answers and guestions.
- Be prepared. Even if you don't have an appointment soon, or you won't be seeing a family member soon, doing the Workbook will help YOU be clear about what matters to you.

TWO WAYS

- 1. If you are doing the Workbook on your computer, be sure to save it to your computer before typing in your answers. Otherwise, what you type will not be saved.
- 2. Many people find it easier to write their answers in the printed document, then make copies of the filled-in document to share with others.

FOR CAREGIVERS

If you are helping someone else complete this Workbook, here are some things to keep in mind:

- Explain why this will help. You might say, "I want to make sure we know what's
 most important to you, so we can have a more useful conversation with your
 health care team."
- Take it in small pieces. It's always okay to skip a question. You can even let the
 person pick the questions that appeal to them. If they get tired or overwhelmed,
 take a break and come back to it later.
- If the person is prone to confusion, keep the number of helpers small. Having
 many people present can increase pressure on the seriously ill person. Have
 one or two people assist in completing the Workbook, then share it with others.

How much information about what might be ahead with your illness would you like from your health care team?
About Me
MY GOOD DAYS • What does a good day look like for you? Here are some things I like to do on a good day:
EXAMPLES Get up and dressed • Play with my cat • Make a phone call • Watch TV • Have coffee with a friend
MY HARD DAYS • What does a hard day look like for you? These are the toughest things for me to deal with on a hard day:
EXAMPLES Can't get out of bed • In a lot of discomfort • No appetite • Don't feel like talking to any
MY GOALS • What are your most important goals if your health situation worsens?
These are some things I would like to be able to do in the future:

Take my dog for a walk • Attend my child's wedding • Feel well enough to go to church • Talk to my grandchildren when they come to visit

Everyone has their own preferences about the kind of care they do and don't want to receive. Use the scales below to think about what you want at this time.

Note: These scales represent a range of feelings; there are no right or wrong answers.

- · Answer where you are right now. For each scale below, think about what you want now. Revisit your answers in the future, as they may change over time.
- Use your answers as conversation starters. Your answers can be a good starting

point to talk with others about why you answ	ered the way you did.
As a patient, I'd like to know	
Only the basics about my condition and my treatment	All the details about my condition and my treatmen

My main								
specialist	Name			Phone number				
Other								
	Name			Phone nu	ımber			

Next Steps

Now that you have completed the Workbook, what's next?

- Talk it over with someone else. If you filled out the Workbook on your own,
 make a time to share your answers and questions with a family member, a
 friend, or another person. You might want to give them a copy of the Workbook
 with your answers written in. See the Conversation Starter Guide for help.
- Talk it over with your health care team. Make an appointment to talk over the
 Workbook, sharing your answers and asking any questions. If your primary
 care doctor or main specialist works with a social worker, that person can be
 an excellent place to start. You might want to give your health care team a
 copy of the Workbook with your answers written in before your appointment.
 See the Guide for Talking with a Health Care Team for help.
- Pick a proxy. This is the person you choose to make medical decisions for you if you are not able to make them for yourself. See the <u>Guide to Choosing</u> a Health Care Proxy for help.
- Keep talking. People's preferences often change as their health changes or as time goes by. Revisit the Workbook over time to see if your answers have changed. And be sure to keep your health care team updated so they know what is most important to you.
